M&E SERVICES

Your organisation is looking to achieve great things, and you need a reliable Mechanical & Electrical contractor to help you get there.

We're the contractor that can help you accomplish this with minimum stress and maximum productivity.

A COMPLETE SOLUTION

Our five specialist divisions can cover all your M&E project requirements, backed up with ongoing maintenance, warranties and support.

Get in touch to find out how our range of services could help.

A NEW ERA FOR M&E

Since 2002, 2Teck has been helping clients to optimise building performance to enable happy, efficient workforces to realise their ambitions.

We pride ourselves on our thorough technical knowledge and understanding of customer needs, ensuring your building and its systems run smoothly right from first installation and for the duration of their lifetime.

What makes us different is our commitment to self-delivering a full range of M&E services. This doesn't mean we're a Jack-of-all-trades though.

Specialist services require expert delivery, which is why we created five dedicated divisions. Each division comprises a team of skilled engineers led by a director with years of experience in their relevant fields.

You can call on all of them, or just one or two – whatever your project requires.

ACCREDITATIONS UNDER OUR TOOL BELTS

Our ongoing commitment to quality, customer service and advancement is recognised with a number of industry-related accreditations.

From consistently demonstrating high standards in the electrical industry to secure annual NICEIC accreditation, to keeping up with the latest standards and training to retain our place on the Gas Safe Register, we work hard to maintain the following endorsements:

PARTNERSHIPS

Leading manufacturers also recognise the quality we strive for in all aspects of our work. As such, we can offer manufacturer-backed warranties from the following:

YOU'LL BE IN GOOD COMPANY

From small offices and manufacturing facilities, to complex multi-site organisations, whatever sector you work in or the size of your project, our range of installation and aftercare services can be scaled to suit your needs.

We're trusted by blue chip organisations, startups and leading fit-out companies nationwide to deliver a full range of M&E services. Work with us, and you'll be among the best.

One company, **five specialist divisions**

We're a

disciplinary
M&E
contractor,**
with five
dedicated
divisions
operating
under the
2Teck roof

POWERING YOUR VISION

Helping companies succeed with resilient electrical infrastructure, suitable illumination, effective power distribution and reliable backup systems. We design, supply and install quality electrical frameworks, helping our clients perform their best.

CREATING COMFORTABLE ENVIRONMENTS

Healthier, more comfortable buildings result in a happier, more productive workforce. From helping clients to control temperatures to keeping up with regulatory changes, we provide a complete end-to-end air conditioning installation service for commercial spaces.

EXPERT SKILLS EXACTLY WHERE YOUR PROJECT NEEDS THEM

Each division operates individually to the highest standards and undertakes small or large projects with equal enthusiasm. But, if your project requires multiple divisions we can also oblige. Working together, our divisions form a M&E powerhouse, taking complex multi-site contracts in our stride.

COMMUNICATIONS

STAY CONNECTED AND PROTECTED

Optimising the IT infrastructure, networks and connectivity which drives your business performance. Our communications, fire and security team supports clients from design through to installation, commissioning and maintenance.

PLUMBING & HEATING

MAKING PIPE DREAMS REALITY

At the centre of every business, and key to creating a sustainable environment, are reliable and efficient plumbing and heating systems. From sleek washroom solutions to facilitation of instant hot and chilled water, our experienced engineers know what's needed.

M&E SERVICES

AT YOUR SERVICE, ALWAYS

You focus on taking care of business, and our M&E service division will help take care of yours. Planned preventative maintenance, fault finding and reactive call outs provide peace of mind, knowing that your building's systems are always optimised.

Other companies offer the same services, **but no one else delivers them the way we do**

YOUR WAY IS THE 2TECK WAY

It's our job to provide a simple solution for you. If you want to involve us in the pre-contract and design phases, we welcome it. If you'd like us to attend client meetings to provide technical input, invite us along. If you need us to carry out works out of hours, just say when.

We fit in with you, reducing headaches during design and planning, and minimising disruption to live working environments during installation.

WE'VE GOT THE TECHNICAL TALENT

Unlike others claiming to offer a complete M&E solution, each of our divisions boasts its own skilled, in-house engineers. Specialist work needs specialist labour, so you'll always have the right expert on the job.

We keep pace with technology and best practice by investing in training, ensuring our team is up to date with the latest industry standards and regulation changes. And we're happy to share this knowledge with you to enhance your projects.

CHAMPIONING A CULTURE OF SAFETY

Achieving and maintaining health and safety standards isn't a tick box exercise, it's an essential legal requirement that keeps our, and your, people safe. As such, we take it incredibly seriously.

You can rely on us for thorough RAMS and up to date certifications, so you can remove people coming to harm onsite, being fined or facing other legal penalties off your list of concerns.

CONFIDENT AND PRESENTABLE, BOARDROOM TO SITE

We like to get noticed and remembered for the right reasons, both around the table and when we're rolling up our sleeves on site. At every stage we're invested in the success of your project, and we hope that the way we present and conduct ourselves helps to demonstrate this commitment.

It's not all smoke and mirrors though. Behind our slick fleet and smart uniforms lies deep technical knowledge, which stems from every member of our team having years of direct on-the-tools experience.

ON TRACK WITH PROGRAMME AND BUDGET

No one wants to contend with project delays, increasing costs or frustrated clients. And we certainly never want to be the cause. The trick to avoiding them involves consistency from us in three main areas.

Managing expectations by designing achievable solutions and setting clear timelines. Being focused on the detail, whether that's quotations, RAMs or booking people onto site. And finally, delivering on our promises. Not to mention keeping you informed at every stage of a project, from concept to handover.

Clients approve of our ways of working

“The team was unwavering in their desire to deliver the best quality job they could. They went above and beyond our expectations focusing on the quality of the end result, rather than opting to make life easier for themselves. It only goes to reaffirm that our decision to partner with 2Teck for these installations was the right one.”

Chief Commercial Officer,
Cybrid Solutions

“We have been using 2Teck since 2014. I have been highly impressed with the high standard of electrical, data cabling, A/C and plumbing services they have provided. No matter which team member is allocated to the work I am confident they will understand the project, be polite and provide a professional service of the highest standard.”

Facilities Manager,
Smeg (UK) Ltd

“From initial introduction to project completion, 2Teck have continually impressed me. The design and selection process was built around my requirements, budget and timescales. The pride in installation and attention to detail from the complete 2Teck team was amazing to see. The certification, warranties and aftercare procedures give me great confidence in my investment.”
