HEATING & COOLING  
F-GAS COMPLIANCE  
VENTILATION & FILTRATION  
EXTRACTION SYSTEMS  
SPECIAL LOCATIONS

**CREATING  
COMFORTABLE  
ENVIRONMENTS**

A complete end-to-end air conditioning installation service for offices, warehouses, data centres and other commercial spaces.

And, to prevent you from getting hot under the collar in the event of a breakdown, our dedicated aftercare service can support you with ongoing maintenance and reactive call outs.

## **CONTROL TEMPERATURES, ENJOY COMFORT**

### **> Heating & Cooling**

Simple, intuitive, smart and energy efficient, it's possible to have it all with a 2Teck air conditioning system.

A bespoke air conditioning solution will shield your building's users and assets from extreme temperatures whatever the conditions outside. And, the latest high-performance systems make use of renewable energy and heat recovery technology, helping you to reduce your energy costs and positively impacting your carbon footprint. Satisfying on all fronts.

We also consider the visual design, discreetly introducing equipment into your environment.

## **KEEP UP WITH REGULATORY CHANGES**

### **> F-Gas Compliance**

If you operate equipment containing F-Gas, you must meet certain requirements by law. Don't know your HFCs and PFCs from your SF6s? Don't sweat it, we've got you covered.

We're Refcom Elite F-Gas certified, as well as a member of the governing body, which means we can provide advice and services for everything you need to comply with the ever-changing F-Gas regulations.

## HEALTHIER BUILDING, HAPPIER WORKFORCE

### > Ventilation & Filtration

Ventilation and air filtration has increased in priority. Most recently because it can help minimise the spread of airborne viruses. But, also because as buildings become more airtight to help meet energy efficiency targets, there is a greater need to maintain indoor air quality.

We design, install and maintain a complete range of effective and efficient mechanical heat recovery ventilation systems and filtration solutions.

## BREATHE CLEAN, FRESH AIR

### > Extraction Systems

Dust and fumes, humidity and odours. All things you can do without in your workplace, and all of which can be minimised with an effective extraction system.

We supply and install a wide range of extraction systems, helping to ensure a healthy environment for your building's users, and compliance with health and safety and COSHH regulations relating to air quality.

## CONTROL DISTINCTIVE CLIMATES

### > Special Locations

Some environments have very specific demands. Heat-generating data centres must be kept cool to protect server functionality. Dust and humidity levels require precise control in clean rooms and laboratories. Ideal temperatures in cellars need maintaining to preserve the quality of the products stored there.

For all of these special environments, reliable HVAC systems are crucial. We can advise on the most suitable systems to keep your special locations functioning at optimal condition.

## A COOL COMBINATION OF SERVICES

As a multi-disciplinary M&E contractor with five specialist in-house divisions, we provide a complete solution for all of your building's needs. Our dedicated aftercare service also takes care of planned preventative maintenance, fault finding and reactive call outs, giving you complete peace of mind.

## Regulating your climate's conditions for a **pleasant, happy workspace**

### **BENEFIT FROM A CLEAN & COMFORTABLE SPACE**

Improving health and hygiene through ventilation and extraction, boosting productivity by maintaining optimal office temperatures, making positive contributions to your sustainability goals and bottom line by enhancing your building's efficiency. Are you missing out on these benefits?

Installing a system that can accomplish all of these things seems an obvious choice. But, when it comes to choosing the right supplier, there's lots to consider.

We think we're a great choice, and here's why.

### **WE'RE ON YOUR BENCH**

We like the individuals who decide to work with us to feel confident in their choice, supported and cared for.

It's why we take a keen interest in understanding the goals of your business from the outset. We're not just 'any old subs', we're always prepped and ready to play for your team.

### **WHEN ONLY THE BEST WILL DO**

When you invest in an air conditioning system, you need to know it's going to keep up with the demands the environment puts it under, now and long into the future. The last thing you need is unhappy staff or visitors, and overheating server rooms caused by faulty equipment. Committed to achieving the highest possible standards, we only supply the best quality equipment.

The way in which the equipment is installed is also key to its longevity. Having demonstrated a high level of care towards designing, installing and maintaining Mitsubishi and Daikin products, we're proud to be recognised as partners. These industry-leading accreditations enable us to provide manufacturer-backed warranties of up to 7 and 10 years respectively, giving you confidence that your air conditioning system is of the utmost reliability and quality.

Working in a responsible and caring manner to **create value for our clients**

## PERFORMING AT OUR PEAK

It's not just about what we do. Equally important is the way we do it. We are committed to adopting safe, high-quality working practices at all times. This approach has earned us several accreditations from leading industry bodies, in recognition of our ongoing commitment to best-practice in all areas of our work.

From demonstrating our competency in refrigerant management and becoming a Refcom Elite Member, to evidencing our ability to meet and exceed the required health and safety standards to achieve CHAS accreditation. Undergoing a range of independent assessments ensures we stay top of our game, so we can help you stay top of yours.

## FRESH THINKING FOR ALL SECTORS

High specification clean room or manufacturing facility, data centre or office; whatever the sector, project or client, we bring our experience and specialist knowledge of air conditioning, ventilation, filtration and extraction systems to create a workable solution to meet the particular demands of your environment.

# Reasons you'll become a fan of 2Teck

“When working on an air conditioning installation, sticking to deadlines is crucial. If a project gets pushed back, it impacts handover dates, can lead to increased costs and could cascade into a bigger problem. 2Teck are my go-to guys for air conditioning, they're always supportive and I can rely on them to get the job done to a high standard.”

**Travis Birtwhistle,**  
Engie

“2Teck really come into their own when providing specialist design support during the pre-contract stage. There are so many variables with air conditioning, and I don't have the expertise to provide measured rates, so I need to work with a knowledgeable provider who can offer guidance and answers to my questions. It's a race to the finish and I know that 2Teck are on my team. They are extremely helpful.”

**Roy Barber,**  
Novex Solutions

“We felt we absolutely had to write to you about the engineers who installed our air conditioning. They were absolutely wonderful! They were not only very friendly but extremely professional and have done a wonderful job here, especially fitting the work around our customers and coming in at unholy hours to get the job finished. We have all enjoyed their company very much.”

**Training Co-ordinator,**  
Wärtsilä Voyage  
Solutions

The way we work ensures the **highest level of care** at all times. We think you'll approve

### **WE HAVE ALL OUR DUCTS IN A ROW**

Up to date qualifications, detailed RAMs, fully equipped engineers – standard things to expect from any air conditioning contractor, surely? In our experience, this isn't always the case though.

Our aim is to make your professional life as easy as possible, by not leaving you exposed by sub-standard work or unsafe working practices. Our NEBOSH Manager keeps us in check with robust processes, thorough documentation and training, so that we can focus on delivering your project efficiently.

### **WE ONLY WEAR ONE HAT**

2Teck is a multi-disciplinary M&E contractor, but we don't share labour between our specialist divisions. Working with experts delivers the best results, and we really know AC as it's all we do.

Having our own in-house workforce to deliver your projects also means we have full control over our fitters. They carry out their work with pride and precision and, by cutting unnecessary links in the chain, you don't have to worry about hidden margins.

### **WE PLAY NICE**

On many jobs, there could be up to 10 different subcontractors on site at any given time. They all have their own individual requirements and priorities, but we only have one focus – your end goal.

Our team understands the importance of working well alongside other subcontractors, to achieve a seamless project delivery.

### **OUR FITTERS ARE FIT FOR THE JOB**

When we're working under your roof, we're representing you. So beyond being qualified and equipped to do a great job, we also look and act the part. If we didn't, it's both of our reputations on the line.

Our uniforms, fleet and culture demonstrate the pride we take in our work, and you can count on us to apply this to any job we undertake. Whether it's a complex AC system for an entire office fit out, or a small server room requiring a unit or two to keep equipment cool, we have the scale to deliver and the attitude to remain professional and personable on site.

### **FLEXIBILITY = PROJECT SUCCESS**

In an ideal world, all projects start on time, the installation runs smoothly and everything is completed by the exact required date, resulting in a very happy client. While this is exactly what we strive to achieve, we also recognise that not all things run 100% according to plan 100% of the time.

If unexpected challenges are encountered or project goal posts shift, we're flexible enough to cope. And we'll stay in close communication with you so you aren't confronted with any nasty surprises.

One company,
