NETWORK CABLING
AUDIO VISUAL
FIRE & SECURITY
ACCESS CONTROL
CCTV SYSTEMS

**STAY CONNECTED
AND PROTECTED**

Communications, fire and security services delivered by our in-house team of engineers, from design through to commissioning.

And, with our dedicated aftercare service, we can handle your ongoing planned preventative maintenance, fault finding and reactive call outs too, ensuring your systems stay at optimal performance throughout their lifespan.

SEAMLESS INFORMATION FLOW

> Network Cabling

When your people depend on technology to do their jobs effectively, professionally installed structured network cabling is crucial to ensure efficiency, productivity and minimal frustration.

From the infrastructure design through to installation, testing and final operational handover, we specialise in data and voice structured cabling.

ENGAGE, COLLABORATE & DELIGHT

> Audio Visual

Workspaces are required to fulfil multiple functions. From facilitating collaboration with remote teams, to creating inspiring environments for diverse and multigenerational workforces.

Looking to creatively convey your company story to visitors? Uninterrupted video and audio conferencing crucial to you securing an international contract? Want to engage students with the latest interactive classroom displays? Not a problem for our knowledgeable engineers.

PROTECT PEOPLE & ASSETS

> Fire & Intruder Systems

Offices, schools, distribution centres, manufacturing facilities... you name it, all occupied environments need to ensure fire and security responsibilities to the buildings' users are met.

Whether your premises is small or large, we work to the latest European EN standards and can advise on the most suitable fire and intruder alarm systems to ensure your people, property and assets are protected 24/7.

MONITOR & MANAGE BUILDING USERS

> Access Control

With ever-evolving security priorities, building owners need to know who is onsite at any given time, and employees want to feel safe in their places of work – enter access control.

Working with leading manufacturers, such as Paxton, we install the latest innovative, integrated systems. This keeps you steps ahead of the latest threats and delivers insightful data on building use.

REDUCE CRIME, IMPROVE EMPLOYEE WELFARE

> CCTV

Deterring criminal activity by increasing the chance of detection, a professionally installed CCTV system is an excellent way to enhance the welfare of your people and keep a watchful eye on your property and assets.

But, not all CCTV systems are created equal. We only work with leading manufacturers to provide high definition cameras which will capture quality images.

THE TOTAL PACKAGE

With five specialist divisions under the 2Teck roof, we can cover all your M&E project wants and needs, backed up with ongoing maintenance, warranties and support.

Get in touch to find out how else our complete offering could help.

Dependable communications, fire and security systems to **drive business performance**

CONNECTING MORE THAN JUST CABLES

Imagine reliable, easy-to-use technology enabling seamless communication and eliminating silos. Imagine reducing staff frustration and increasing productivity. Imagine creating memorable experiences for employees, clients and visitors.

For two decades, our communications division has been making this a reality for organisations across the UK. Building, supporting and optimising the IT infrastructure, we are aiding the networks and connectivity which drives business performance.

WE WORK TO ONE AGENDA – YOURS

Whether working in partnership with fit-out companies or directly with clients, in new and refurbished buildings, you'll often hear our communications team saying "you're the customer, we'll make it happen".

We put emphasis on listening to what you and your organisation needs as an outcome so we can design the solution that really will make that a reality.

PROTECTING MORE THAN JUST ASSETS

Having fire and security systems in place shouldn't be a tick box exercise. Today's workplaces have greater demands. Your staff and visitors want reassurance that they are safe from both unauthorised intruders and the risk of fire, and you likely have valuable property and resources to safeguard too. Working with the 2Teck communications team brings these benefits and so much more.

Picture being confident that your people, property and assets are well protected. Enjoy peace of mind knowing that we're safeguarding your reputation, by being on site when expected and delivering the job as promised. Enjoy the reassurance that being able to rely on the installed systems brings, certain that you won't be left exposed by unforeseen downtime.

Our clients rest safe in the knowledge that their needs, and those of the people who occupy their buildings, have been reliably and effectively protected by our communications team.

Working with clients and manufacturers to **form powerful partnerships**

COMMITTED TO QUALITY, SERVICE AND INNOVATION

If there's one thing we want to be remembered for, it's the quality of our work. We aim for this to shine through in all areas, from our uniforms and fleet through to the products we install and the end results we deliver for clients.

We must be doing something right, as leading manufacturers and industry bodies recognise our commitment to quality in all aspects of our work. As such, we can offer manufacturer-backed warranties of up to 25 years, so you can be sure you have the most resilient and reliable network, fire and security systems possible.

We've also earned a number of industry-related accreditations that we're really proud of, including:

EXPERIENCED IN SERVING ALL SECTORS

Whatever your environment and project requirements, our range of communications, fire and security solutions will benefit organisations of all sectors, shapes and sizes. From a small office to a large warehouse, a manufacturing premises to a complex multi-site facility, we can scale our offering to suit your precise needs.

Put us to work,
we won't disappoint

"As they've demonstrated great knowledge and their quality of work is excellent, I can be hands-off with them knowing they will deliver on time and to a high standard. Their whole approach and understanding of our requirements addresses any concerns I may have early on, especially at a site where any downtime would be catastrophic."

John Jones
Surrey County Council

"Something that is often overlooked by subcontractors is how they come across on site. They understand that they represent me and the Council - it's as if 2Teck are wearing a Portsmouth City Council t-shirt."

Anthony Hadley
Portsmouth City Council

"I've been let down by other contractors in the past by not turning up when they say, despite multiple emails and promises. This is frustrating as I can't let issues back up, and it can also reflect badly on me. I've never had this experience with 2Teck."

Sue Hortop
The Mead Infant
& Nursery School

We think you'll like our ways of working, they're based on how you like to work too

WE WANT TO DO A GREAT JOB, SO WE DO IT OURSELVES

If you've chosen to work with us, it's because you trust that we'll do a great job, so we won't then sub your work out to third parties. We like to keep a close eye on the quality of any work we put our name to, monitor our punctuality and ensure professional behaviour on site, so all of our engineers are directly employed by 2Teck.

WE'RE COMPLIANT AND QUALIFIED

We take achieving and maintaining the highest health and safety standards seriously. Our RAMS are thorough so you don't need to worry about people coming to harm onsite, being fined or facing legal penalties.

From our directors to our onsite engineers, we're all fully qualified specialists and have on-the-tools experience. Committed to ongoing training, we keep pace with evolving technology and best practice techniques.

WE LOOK THE PART AND BEHAVE PROFESSIONALLY

We understand that we're working as an extension of you, and that your reputation is on the line if we don't conduct ourselves in an appropriate way. We often receive comments (positive ones) about the way our engineers present and conduct themselves on site. Smart, professional and polite are the three most commonly used descriptors.

PRECISE AND PROMPT, QUOTATION TO HANDOVER

No one wants creeping timeframes and unforeseen costs. To avoid this, we ask the right questions from the outset and take a consultative approach to ensure we've fully understood your requirements. Then we provide detailed specifications and accurate quotations. Simple.

And as for the paperwork, you won't have to chase us for specifications, RAMS, warranties or final testing reports. All documentation will arrive with you promptly and thoroughly completed.

WE'RE IN THIS FOR THE LONG RUN

We're not in the business of getting a foot in, getting the job done and getting out. Our approach means we've built up some great long-standing relationships with clients, who trust us time and time again.

We've been in this business since 2002 and we intend to safeguard our reputation and continue to build on this heritage by consistently delivering great work.
